

Nzk-003

Nzk-003

Tall and bold with an exterior designed to stand out from the crowd. **Nzk-003** has been engineered to adapt to a wide variety of touchscreen or non touchscreen applications. **Nzk-003** has the ability to be used in various applications from retail browsing, online booking systems, recruitment applications or providing general information to the public. The unit has been designed with the ability to add printers, speakers, WebCams, and transactional payment components all contained within the rear.

The front panel has the limitless colour options from stainless steel to most colours available which will enhance users to interact with the kiosk.

You choose the 'use' and we deliver the required solution, the choice is always yours.
